

GENERAL SERVICE TERMS & DIAGNOSTIC AGREEMENT

STANDARD MOBILE REPAIR WORK AUTHORIZATION CONTRACT

This General Service Terms Agreement establishes the operational boundaries, authorization parameters, and payment structures between Matt's Mobile Automotive Repair Service ("Provider") and the vehicle owner or authorized client ("Client"). This contract applies to all mobile diagnostic, maintenance, testing, and component replacement services performed.

1. QUOTED JOB STRUCTURE & IMMEDIATE PAYMENT POLICY

Standard maintenance and repair jobs are performed on a fixed-rate quote or pre-disclosed diagnostic flat fee structure discussed prior to vehicle service arrival.

- **Earned Fees:** Diagnostic flat fees cover the specialized evaluation time, software deployment, and route call-out logistics required to isolate a vehicle system fault. Once the diagnosis is rendered, this fee is fully due regardless of whether the client chooses to fund the underlying physical fix.
- **On-Site Settlement:** Full payment of the invoice total is strictly due immediately upon service completion. The client agrees to settle the statement via cash or authorized Electronic Funds Transfer (E-Transfer) on-site before the mobile service rig departs.

CONTINGENCY COMPLICATION RATE: \$100.00 / HOUR

Standard quotes assume standard hardware conditions. If an unquoted structural mechanical complication occurs—including but not limited to frozen caliper pistons refusing to decompress, seized slide pins, rusted fasteners snapping, or hardware requiring on-site drilling, extraction, thread-tapping, or re-threading—the extra remediation time will be billed seamlessly as a Contingency Labor Fee of \$100.00 CAD per hour.

2. ENVIRONMENTAL CORROSION, RUST, & COMPONENT DEGRADATION POLICY

Mobile field repairs are routinely executed on vehicles exposed to regional environmental corrosion, heavy road salt, rust oxidation, and thermal aging.

- **Unforeseen Fastener Failure:** During standard structural teardowns, heavily oxidized bolts, rusted studs, factory exhaust mountings, or brittle engine bay plastic clips may snap, shear, or crumble under normal tool torque.
- **Remediation Labor:** The provider executes all installations utilizing standard trade care. If brittle, aged, or rusted hardware fails during standard disassembly, the extraction and re-tapping labor required to make the platform roadworthy constitutes an extra operational expense and triggers the contingency field rate.

3. AUTHORIZATION FOR ON-SITE FIELD TESTING

The client hereby grants the provider explicit authorization to operate the vehicle's engine, electronic sub-systems, electrical accessories, and drive mechanisms on-site for the purposes of diagnostic testing, calibration, and repair verification.

4. HIDDEN & PRE-EXISTING DAMAGE DISCLAIMER

Mechanical assemblies often mask secondary hidden damage that can only be identified upon partial component removal (such as deteriorated sub-wiring harnesses, internal casting fractures, or fluid leaks beneath intake/shroud structures). If secondary hidden damage is discovered during teardown, the provider will halt work immediately, photograph the fault, and communicate the necessary repair path. The provider is not responsible for pre-existing vehicle failures uncovered during standard service access.

5. DRIVEWAY DISRUPTION & DEAD-VEHICLE ABANDONMENT

In severe mechanical failure scenarios where a vehicle requires extended component delivery timelines, the vehicle may remain immobile or disassembled temporarily in the client's driveway or designated lot footprint. The client assumes full legal and financial responsibility for any municipal zoning compliance, homeowner association (HOA) rules, or landlord disputes concerning a disabled vehicle parked on-site.

6. ONTARIO REPAIR AND STORAGE LIENS ACT (RSLA) NOTICE

In accordance with Ontario law, Matt's Mobile Automotive Repair Service reserves a possessory or non-possessory lien under the *Repair and Storage Liens Act* (RSLA), R.S.O. 1990, c. R.25, against the vehicle serviced for all unpaid amounts, including diagnostic fees, labor, parts, towing, or storage costs. The client acknowledges that the vehicle may be subject to seizure or holding if full on-site payment is not settled via cash or E-Transfer immediately upon service completion.

Work Authorization Sign-Off: By signing below, the client authorizes the diagnostic evaluation or listed mechanical repair work to proceed. The client fully acknowledges, accepts, and binds themselves to the flat quote terms, the \$100.00/hr complication contingency rate structure, immediate on-site payment rules, and Ontario RSLA lien provisions.
