

MATT'S MOBILE AUTOMOTIVE REPAIR SERVICE

PARTS POLICY & SERVICE NOTICE

CLIENT-SUPPLIED PARTS LIABILITY WAIVER & AGREEMENT

Matt's Mobile Automotive Repair Service operates as an on-site, mobile repair unit. Because scheduling, specialized tool loading, and route dispatches are customized tightly to each scheduled appointment, specific liabilities and terms apply to all components provided directly by the customer ("Client-Supplied Parts").

1. COMPLETE ABSENCE OF PARTS WARRANTY & LABOR COVERAGE

Matt's Mobile Automotive Repair Service explicitly offers no warranty, guarantee, or liability coverage of any kind on parts, electronics, seals, assemblies, or fluid items provided by the client.

- **Workmanship Limitation:** Any operational protection covers structural installation labor exclusively.
- **Defective Component Labor Costs:** If a customer-provided part fails or exhibits a material defect during or after installation, any subsequent diagnostics, teardowns, component removals, and re-servicing will be billed at our standard mobile field labor rate of \$100.00 CAD per hour.

2. PART INCOMPATIBILITY & MOBILE FITMENT DISRUPTION POLICY

It is the sole responsibility of the client to confirm that all supplied items perfectly fit and function according to the vehicle's specific Vehicle Identification Number (VIN), configuration trim level, and model year.

If our mobile technician arrives on-site and must halt or terminate the scheduled service due to incorrect components, unboxed material defects, misordered parts, or missing critical structural installation hardware:

MANDATORY SERVICE DISRUPTION & DISPATCH CHARGE

The client agrees to pay an immediate flat fee of \$75.00 CAD. This non-negotiable charge is strictly required to cover our technician's travel time, wasted fuel expenses, wear and tear on the mobile fleet rig, lost operational revenue slots, and field dispatch logistics.

- **Lien Enforcement:** Unpaid disruption fees or field labor charges resulting from incompatible or defective client-supplied components are fully subject to enforcement and collection under the Ontario *Repair and Storage Liens Act* (RSLA).

3. MID-SERVICE STRUCTURAL TEARDOWN & VEHICLE STATUS

In scenarios where a structural vehicle teardown has already commenced prior to discovering that a client-supplied component does not fit or is defective, the technician is not obligated to reassemble the vehicle using the old or broken parts for free.

If the client requests reassembly to maintain vehicle rolling capability, that operational time will be billed at our flat field rate of \$100.00 CAD per hour. Otherwise, the vehicle will be left in its current status on the client's property, and the standard \$75.00 disruption fee will apply immediately.

4. WORKSPACE SAFETY & PROPERTY LIABILITY WAIVER

All operations are performed directly on client-authorized properties (such as driveways, lots, or curbsides). The client agrees to maintain a safe distance of at least 3 meters away from the mobile service rig and active vehicle repair zone at all times. Matt's Mobile Automotive Repair Service is completely exempt from, and carries zero

liability for, any accidental property damage, structural concrete or driveway staining, or environmental fluid drops resulting from standard mobile repair procedures.

5. ABSOLUTE RIGHT OF PART REFUSAL

Matt's Mobile Automotive Repair Service reserves the absolute right to refuse installation of any client-supplied component deemed visibly unbranded, cracked, structurally compromised, or unsafe for public road use. Refusal of structurally unsafe parts triggers the standard \$75.00 CAD service disruption fee.

Acknowledgement of Terms: By signing below, the client confirms that they have read, understood, and consented to the constraints regarding customer-supplied hardware. The client accepts financial liability for the \$75.00 disruption fee and the \$100.00/hr field labor rate terms outlined above, and acknowledges RSLA enforcement rights for any outstanding balances.
